Editorial Production, John Wiley & Sons: Sheila Kaminsky

The *International Journal of Quantum Chemistry* (ISSN 0020-7608) is published semimonthly with one extra issue in January, March, May, July, August, and November by John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10158.

Copyright © 1997 John Wiley & Sons, Inc. All rights reserved. No part of this publication may be reproduced in any form or by any means, except as permitted under section 107 or 108 of the 1976 United States Copyright Act, without either the prior written permission of the publisher, or authorization through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, (508) 750-8400, fax (508) 750-4470. Periodicals postage paid at New York, NY, and at additional mailing offices.

The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicate the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law.

This consent does not extend to the other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective work, or for resale. Such permission requests and other permission inquiries should be addressed to the Permissions Dept.

Subscription price (Volumes 61–65, 1997): $3,860.00 in the US, $4,160.00 in Canada and Mexico, $4,355.00 outside North America. All subscriptions outside US will be sent by air. Personal rate (available only if there is an institutional subscription): $190.00 in North America, $370.00 outside North America. Subscriptions at the personal rate are available only to individuals. Payment must be made in US dollars drawn on a US bank. Claims for undelivered copies will be accepted only after the following issue has been received. Please enclose a copy of the mailing label. Missing copies will be supplied when losses have been sustained in transit and where reserve stock permits. Please allow four weeks for processing a change of address. For subscription inquiries, please call (212) 850-6645; e-mail: SUBINFO@Wiley.com.

Postmaster: Send address changes to *International Journal of Quantum Chemistry*, Susan Swanson, Director, Subscription Fulfillment and Distribution, Subscription Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

Advertising Sales: Inquiries concerning advertising should be forwarded to Susan Levey, Advertising Sales, John Wiley & Sons, Inc., 605 Third Avenue. New York, NY 10158; (212) 850-8832. Advertising Sales, European Contact: Michael Levermore, Advertising Manager, John Wiley & Sons, Ltd., Baffins Lane, Chichester, Sussex PO 19 1UD, England.

Reprints: Reprint sales and Inquiries should be directed to the customer service department, John Wiley & Sons, Inc. 605 Third Ave., New York, NY 10158. Tel: 212-850-8776.

Manuscripts should be submitted in triplicate and accompanied by an executed Copyright Transfer Form to the Editorial Office, *International Journal of Quantum Chemistry*, Quantum Chemistry Group, Uppsala University, Box 518, S-75120, Uppsala, Sweden. Authors may also submit manuscripts to the Editorial Office, *International Journal of Quantum Chemistry*, Quantum Theory Project, Williamson Hall, University of Florida, Gainesville, Florida 32611. **Information for Contributors** appears in the first and last issue of each volume. **All other correspondence** should be addressed to the *International Journal of Quantum Chemistry*, Publisher, Interscience Division, Professional, Reference, and Trade Group, John Wiley & Sons, Inc., 605 Third Avenue, New York, NewYork 10158, U.S.A. The contents of this journal are indexed or abstracted in *Chemical Abstracts, Chemical Titles, Chemical Database, Current Contents/Physical, Chemical, and Earth Sciences, Research Alert (ISI), Science Citation Index (ISI),* and *SCISEARCH Database (ISI).*

This paper meets the requirements of ANSI/NISO Z39. 48–1992 (Permanence of Paper). ♾

Octachlorodirhenate, 607
One-electron basis sets, 183
One-electron systems, 513
Optimized effective potential (OEP) method, 95
Orbital symmetry, 325
Organic diamagnetic susceptibility, 635
Oscillator, 111
Oxygen content, 703

Parallel computers, 63
Parallel-spin correlation, 427
Paramagnetic molecules, 571
Partitions, 421
Peierls instability, 325
Perdew–Wang 91 (PW91) generalized gradient approximations, 285
Perdew–Zunger exchange-correlation functionals, 243
Photodesorption, 71
Poisson equation, 121
Polarization propagators, 599
Polyethylene, 481
Polyiodide chains, 473
Polymers, 301
Polynuclear aromatic hydrocarbons (PAHs), 271
Polytetrafluoroethylene systems, 243
Post-Hartree–Fock calculations, 171
Potential energy surfaces, 211, 553
Proteins, 351, 379
Pseudomagnetic fields, 581

Quadratic response functions (QRFs), 599
Quadruple metal bonds, 607
Quantum mechanics, 679
Quantum-limit phenomena, 619
QR–SCMEH–MO calculations, 297

Radial correlation, 661
Random cubic oscillator, 403
Reaction field spectral shifts, 143
Reaction probability distribution (RPD), 337
Reactivity of flavoproteins, 721
Real magnetic fields, 851

^1S and ^3S states of the helium atom, 661
SCF calculation, 63
Second-row elements, 255
Semiempirical AM1 calculations, 249
Semiempirical molecular orbital theory, 143
Singlet nitromethane, 263
$[SmCp^*]_4$ $(N_2H_2)_2(N_2H_3)_4$ $(NH_3)_2$ cluster, 297
$SO(2,1)$ group, 655
Solid spherical harmonic Gaussians, 647
State inversion, 607
Stochastic theory of rate processes, 393
Strong magnetic fields, 501, 513, 523, 553, 561
Superconducting transition temperatures, 459
Superconductor, 703
Symmetric group, 421
Symmetry, 669
Symmorphy, 669

$3d \rightarrow 3d$ excited states, 453
Tight-binding energy-band calculations, 459
Time-dependent cubic oscillator, 403
Topology, 669
Triplet nitromethane, 263
Tunneling dynamics, 403
Tunneling rate, 403
Tunneling through fluctuating barrier, 403

Ultrahigh magnetic fields, 619
Urea–nitrate (UN), 247

Verdet constant, 599

Weak interactions, 211

Zeeman effect, 571, 607
